

# Generative AI Proof of Value

**Turn your ideas and opportunities into action plans and execution with Caylent's AI and data teams**

Caylent's Generative AI Proof of Value addresses the immense potential for this technology wave to transform organizations and business models, reinvent customer experiences, create innovative new applications, and massively improve productivity. To catch the wave, it's crucial to have a partner like Caylent that can lead collaborative strategy workshops as well as execute tactically and deliver tangible results.

Our team knows that data is the fuel for your AI transformation journey. Beyond strategy, our proven expertise in training traditional ML models, designing and implementing MLOps automation, and implementing modern data strategies with our Governed Data Platform™ makes us a partner that will deliver results and ensure your AI adoption takes off.

## Key Activities

### 01 – Awareness

Review the AI landscape, your business possibilities, practical considerations, and the supporting AWS services

### 02 – Readiness

Develop your strategy, assess your readiness, select initial use cases, and collaboratively create your implementation roadmap

### 03 – Execution

Build your vision with our AI services, supported by a data modernization strategy, automation, and data engineering as needed

## Engagement Details

### Enablement & Ideation

- Establish a common understanding of AI in your organization
- Identify high priority use cases for implementation
- Assess your data and organizational readiness
- Create your custom AI roadmap

### Activation

- Prepare your organization
- Implement data strategy and platform
- Validate expectations with prototype
- Establish governance
- Fine tune ML models
- Establish meaningful and safe use of Generative AI in production
