

## ACCELERATORS TO JUMP-START YOUR CLOUD NATIVE JOURNEY ON AWS

Caylent Catalysts are our collection of accelerators, designed to jump-start your modernization initiatives!

Engagement activities include discovery and planning, analysis of your environment, enablement workshops, as well as action plans and code templates to help fast-track your AWS adoption goals.

### AWS CONTROL TOWER

Establish a secure, compliant Landing Zone - tailored to your requirements through a series of interactive workshops and accelerators, creating a production-ready AWS foundation.

### KUBERNETES

Accelerate your Kubernetes on AWS adoption roadmap by giving your team a reusable automated pipeline for managing your clusters, operators & containers.

### SECURITY & COMPLIANCE

Includes current state security posture assessment and a prioritized list of cloud security deliverables based on governance, risk, and compliance remediation activities.

### CLOUD NATIVE APPS FOUNDATION

Fast-track designing new cloud native applications with a secure, reliable and scalable development foundation, and pathway to a minimum viable product (MVP).
