

Cloud Migration Quick Start

Expert execution for teams on a hard deadline

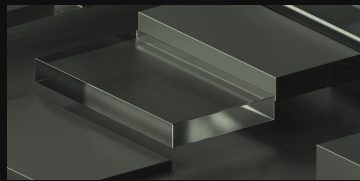

When you face a hard cutover date, Caylent fills the expertise and bandwidth gap to meet it.

When a datacenter lease, VMware renewal, or hardware end-of-life sets the timeline, most lean teams lack the migration skills or capacity to execute against it.

Caylent executes your migration end-to-end for environments up to 50 workloads: discovery, landing zone, workload migration, and cutover. As back-to-back 2024 and 2025 AWS Global Migration Partner of the Year, we bring the expertise your team needs.

Capabilities & Outcomes

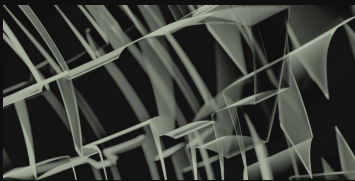

Rapid Migration Roadmap

Agentic discovery produces a validated inventory, dependency map, and wave sequencing plan in days

Compliance-Ready Foundation

Control Tower and automated guardrails configured before workloads move, with HIPAA, SOC 2, and PCI support.

Skills and Capacity Coverage

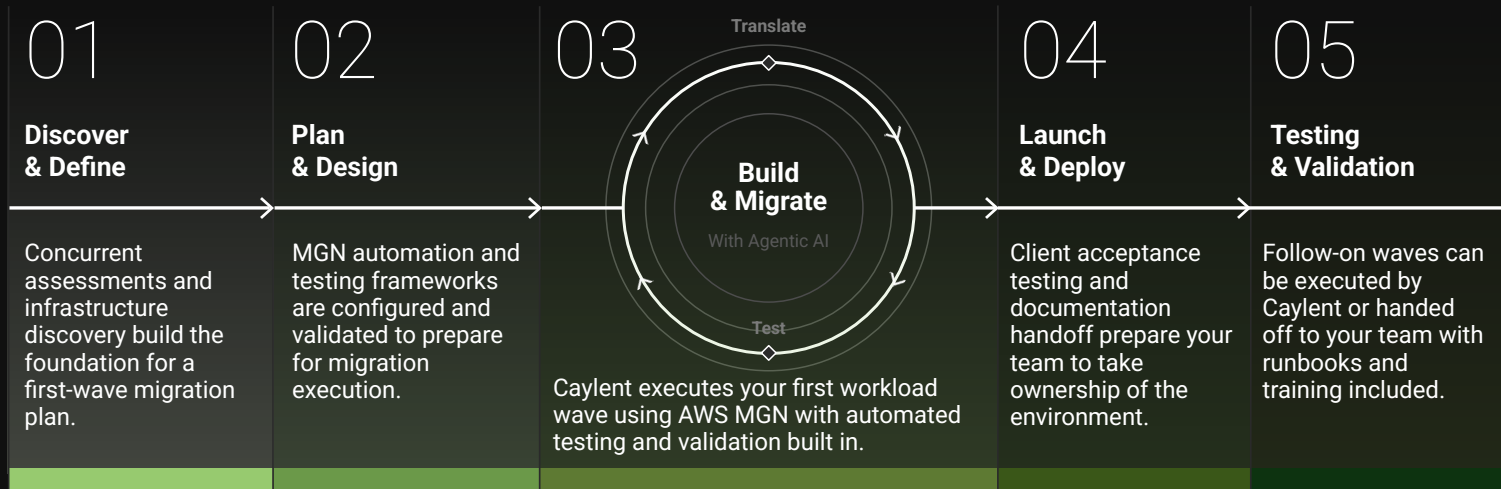

Migration-specific infrastructure, database, and IaC expertise covering the skills and capacity gap.

Operational Environment Handoff

Terraform templates and runbooks specific to your environment so your team can own what we deliver.

Our Approach

Deliverables

Assessment and Migration Plan	Validated inventory, dependency map, wave sequencing plan, and cost analysis your team executes against.
AWS Landing Zone	Secure, governed multi-account foundation with Control Tower, IAM, networking, guardrails, and compliance controls.
First Migration Wave Execution	Up to 50 VMs migrated via AWS MGN with automated replication, testing, and cutover validation.
Migration Validation and Testing	Automated testing and go-live validation confirming each workload meets acceptance criteria before cutover.
Knowledge Transfer Documentation	Environment-specific runbooks, Terraform templates, and hands-on training so your team can operate what was built.

Customer Story

- K-12 Education
- VMware Migration

Aurora Public Schools

Challenge

Aurora Public Schools faced an expiring Outposts contract and rising Broadcom costs, with a hard deadline and no AWS experience.

Solution

Caylent migrated 127 servers in 14 weeks using AWS Application Migration Service and Caylent Accelerate™, standing up AWS Control Tower and security guardrails in parallel.

Aurora completed its migration 7 weeks faster with Caylent Accelerate™, meeting the Outposts contract deadline with no downtime.

Let's Get Started

Whether you are just starting your cloud journey or facing an imminent deadline, Caylent can help at any stage of the migration.

Start with a Cloud Migration Quick Start: a fixed-price engagement in 4 to 10 weeks, with AWS MAP funding available for qualifying engagements.
