Data, Analytics, & AI

Develop governed data platforms to operationalize and transform data into insights via expertly engineered pipelines, BI tools, and data lakes

Modernization

Modernize legacy applications with advanced container and serverless technologies to increase agility, scalability, and efficiency

How to share the offer with your customer

01. AWS provides Customer's AWS Account ID to Caylent or fill out [this form](#)
02. Caylent creates Private Offer with ID (can take up to several hours)
AWS or Caylent shares private offer URL directly with customer
03. Customer navigates to the Private offer URL, which displays an acceptance page to view the offer
Need to be logged into the same AWS Account ID used in step 1 or Management account
04. Once customer accepts, Caylent will be notified and will schedule a consultation directly with the customer
