

SMB Analytics Platform with Generative BI

Get your data working for you in 7 weeks, not 7 months

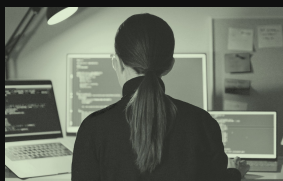

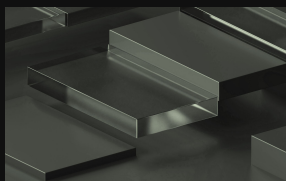

Is your data trapped in silos without analytics insights?

Many SMBs and ISVs struggle to run analytics across siloed data, putting excessive performance strain on operational systems and degrading data quality. Without a modern data platform, analytics workloads become costly and inefficient, therefore limiting insight generation, competitive advantage, and customer value creation.

Unlock your data with modern, analytics-ready platforms with our proven accelerators, built on the Amazon SageMaker Unified Studio and Quick Suite.

Our comprehensive analytics platform accelerator implements the Amazon SageMaker Unified Studio with pre-built modules to move quickly to ROI. Built specifically for SMBs and ISVs, we enable embedded analytics and self-service capabilities through Quick Suite, positioning you for future AI initiatives.

Where We Can Help

Platform Foundation

Serverless data architecture foundation for scalable analytics with automated ETL pipelines and data governance.

Quick Suite Analytics

AI-powered natural language queries and embedded analytics framework for real-time insights.

Pre-Built Accelerators

Terraform modules and CI/CD pipelines for rapid deployment with security and monitoring.

Embedded Analytics

Integration patterns for embedding analytics into existing applications and products.

Knowledge Transfer

Comprehensive documentation, user training, and developer enablement for ongoing success.

Our Approach

01

Discover & Define

Identify data sources and assess connectivity with reporting model definition.

02

Plan & Design

Design the architecture and gather requirements for platform and analytics components.

03

Build & Validate

Develop the core platform and the analytics layer using pre-built modules.

04

Launch & Deploy

Test platform integrations and implement the embedded analytics framework.

05

Manage & Extend

Conduct knowledge transfer and deliver documentation for ongoing operations and future scalability.

Deliverables

Data Platform Foundation

Serverless data architecture with automated ETL pipelines and governance framework.

Quick Suite Implementation

Quick Suite setup with embedded analytics framework for existing applications.

Platform Infrastructure as Code

Terraform modules with CI/CD integration and security baseline implementation.

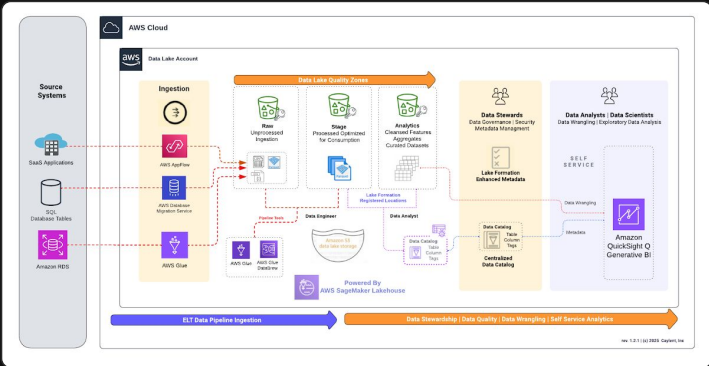

Knowledge Transfer & Enablement

Platform documentation, user training, and developer enablement for ongoing success.

Integration & Support Setup

Complete integration testing with maintenance guidelines and ongoing support framework.

Architecture

Our architecture leverages AWS native services with pre-built Terraform modules for rapid deployment.

The serverless design scales automatically while embedded Quick Suite integration enables immediate analytics value.

Refined Through Real-World Implementation

Built on experience from multiple customer engagements, now accelerated through AWS-native services

Challenge

A B2B software company had dashboard tools that created friction for clients and increased internal workload. They needed a more intuitive, self-service analytics service to reduce support overhead and differentiate their offering.

Solution

Caylent implemented a Generative BI POC with Amazon Quick Suite and custom conversational interfaces, turning static dashboards into natural language-driven tools and enabling long-term ownership through collaborative development.

Unlocked faster, more accessible analytics for clients while freeing internal teams to focus on higher-value work.

Amazon Quick Suite Generative BI SaaS B2B

Let's Get Started

No matter where you are on your journey, Caylent can help you quickly achieve your AI goals, from reinventing customer experiences and creating innovative new applications to massively improving productivity.

Whether you are looking to define a use case, create a roadmap, build a prototype, or implement a production ready solution, Caylent has a suite of offers tailored specifically to accelerate your goals.
