CAYLENI

Video Understanding with Generative Al

Unleash the full potential of your media and entertainment data

Untapped Value Remains Hidden Within Video Assets

Organizations often handle video content through separate systems that look at visuals, audio, and text independently. This disconnected approach misses the bigger picture and fails to unlock the true value of video assets, where just *one minute of video can contain as much information as 1.8 million words*. Companies need a holistic approach to video understanding that transforms content from an underutilized asset into a source of strategic insight.

Transforms Your Video Data into Actionable Intelligence and Personalized Experiences

Our solution uses AWS AI to process visual, audio, and text elements simultaneously, delivering context-aware intelligence that mimics human perception. This enables automated highlight generation, personalized content recommendations, and real-time audience engagement across streaming platforms—transforming fragmented analysis into an AI ecosystem that drives viewer retention and monetization.

Where We Can Help

Automated Production & Distribution

Character and scene analysis, automated content moderation, and intelligent content repackaging for streamlined production and distribution workflows

Personalized Content Discovery

Searchable content archives, auto-generated highlights, and personalized clip creation to transform vast libraries into discoverable, monetizable assets

Smart Content Optimization

Automated tagging, smart content recommendations, and advertising placement for enhanced viewer engagement and revenue maximization

Gaming Analytics & Highlights

In-game footage analysis, player behavior insights, and automated highlight generation to enhance esports content and community engagement

Real-Time Visual Intelligence

Advanced play analysis, automated highlight creation, and real-time performance metrics for comprehensive game coverage and fan experiences

Plan & Design

Design secure, optimized AWS-based content processing architecture

Launch & Deploy

Deploy with real-time monitoring and revenue optimization controls

Our Approach

01 02

03

04

05

Discover & Define

Evaluate content libraries and identify high-value opportunities

Build & Validate

Implement workflows, configure models, and develop recommendation engines

Manage & Extend

Provide knowledge transfer and support for long-term evolution

CAYLENT

Video Understanding with Generative Al

Unleash the full potential of your media and entertainment data

Deliverables

Architectural Blueprint	Complete infrastructure-as-code templates for consistent, repeatable deployment
Optimized Model Implementation	Pre-configured Foundation Models with performance tuning and responsible Al guardrails
Prototype Application	Functional prototype demonstrating key video understanding capabilities for your use cases
User Testing	Structured validation framework to ensure solution meets business requirements
Production	End-to-end deployment pipeline with monitoring and automated scaling

Customer Story

Generative Al

Media Discovery

Al Video Search

Challenge

A leading media technology provider needed a smarter way for users to search video content since the existing system couldn't understand context, making it difficult to find relevant footage.

*Anonymized

Solution

An Al video understanding solution combining semantic search, audio transcription, and public figure detection that was fully integrated into existing media platform.

Results

The solution earned top recognition at a major industry event, impressed stakeholders with Al-powered search, and opened the door for future Al innovation initiatives.

Let's Get Started

No matter where you are on your journey, Caylent can help you quickly achieve your Al goals, from reinventing customer experiences and creating innovative new applications to massively improving productivity.

Whether you are looking to define a use case, create a roadmap, build a prototype, or implement a production ready solution, Caylent has a suite of offers tailored specifically to accelerate your goals.
